

## Upper Legform Impactor

# Pedestrian Legform Impactor

This impactor satisfies the requirement for sub-system testing of the bonnet/hood leading edge of all vehicles to GTR No. 9, the Commission Regulation (EC) No. 631/2009, EEVC WG 17 and EuroNCAP. It has also successfully performed tests into bull bars and high bumpers.

The instrumented package (UL/1) includes load transducers and charge amplifiers, cables, clutch fittings, weights, strain gauged front member, certification tube, skin assembly, 12 certified flesh sets, user documentation and, if required, a program to calculate test parameters.

At an additional cost, a senior engineer is available to assist with installation, set up and training. Dates are by mutual agreement, typical lead time is 3-4 weeks

Spare parts, consumables, repair and certification services for the impactor are also available
