ATD Brand Harmonization Task Group

Intent was to include many (but not all) of the major users of ATDs and ATD parts from Humanetics.

This group is simply making technical recommendations and is not passing regulations, laws, or publishing test procedures.

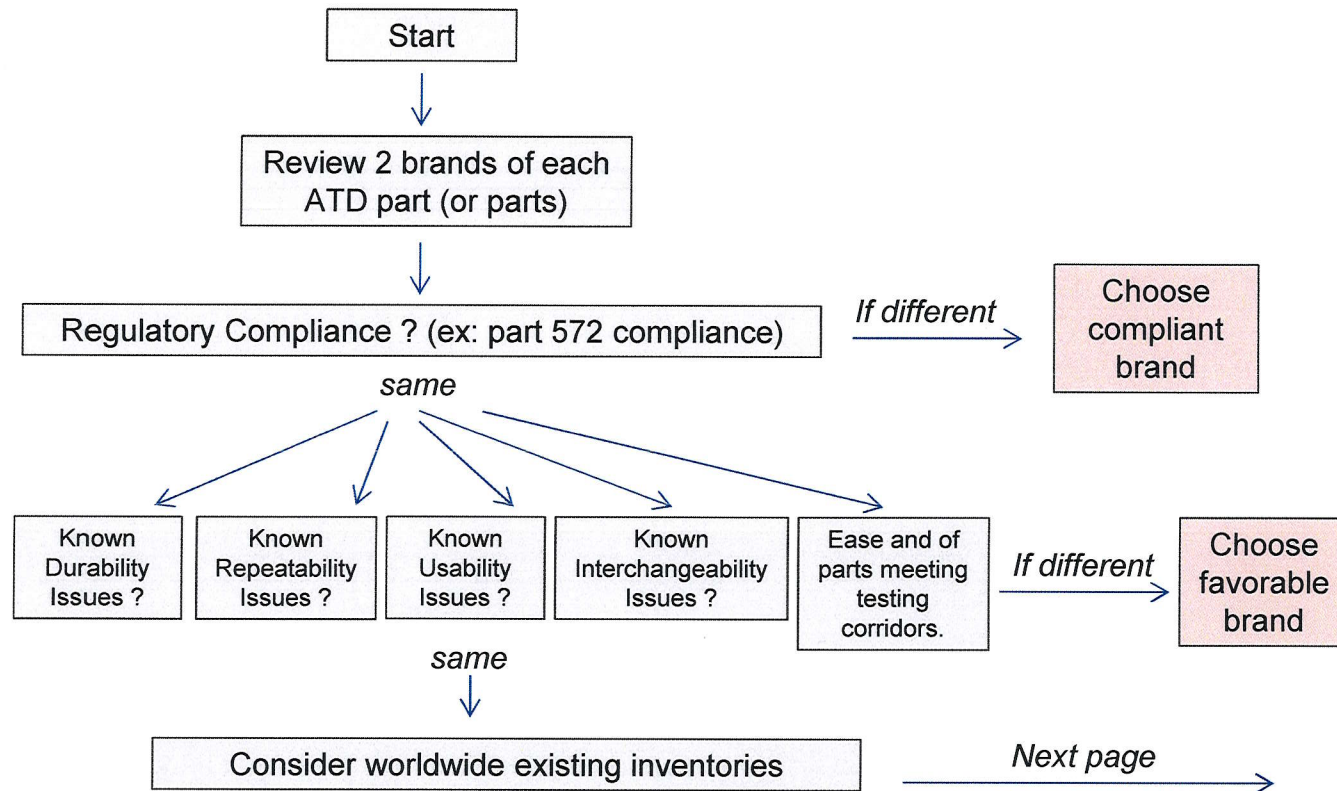

Others are free to make separate recommendations to Humanetics.

16 voting members and several guests attend the reviews.

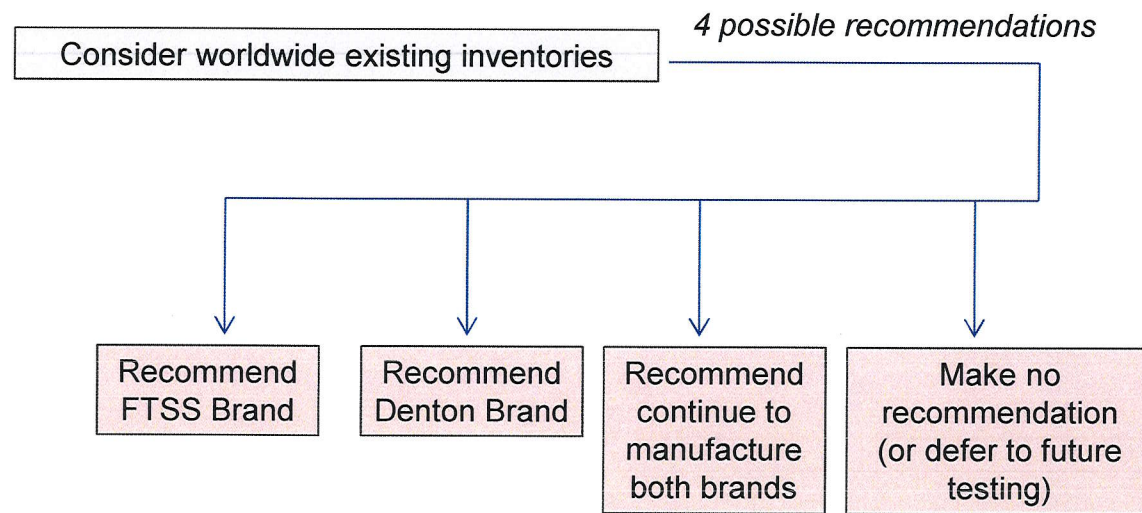

Harmonization Process – Process

**This group will make customer recommendation to Humanetics. No legal or regulatory solicitation.
No documentation changes will be recommended.*

Draft Minute

— Humanetics Brand Harmonization

Chairman Irwin presented an update on the Denton and FTSS dummy brand harmonization on behalf of Mr. Jack Jensen. See document N958. Mr. Petit was concerned about the duration of time for which both brands will be available. He wants the time period to be defined. Mr. Ozawa encouraged the group to accept only the parts that best match the Part 572 drawings. He does not want the NHTSA drawings to change.
